

# Gold Certified Product

## *Global Satellite Engineering,*

the manufacturer of a commercial IoT-based product identified as **GSatSolar** has completed testing and verification which demonstrates that the said commercial IoT-based product, when operating in the environmental conditions set forth in the **Globalstar Gold Certification Process**, achieves the required message success rate for use with the Globalstar Satellite Network.

**Global Satellite Engineering** has certified that all other units of the same product code will meet all technical requirements in a similar manner to the unit subjected to testing and verification.

**0034**

Certification Number

A handwritten signature in black ink, appearing to read "Mark L. Whitman".

VP, Product Engineering

**August 1, 2023**

Date

The full local certification details of the GSatSolar are documented and stored for reference at Globalstar. Authorization of the commercial IoT-based product to operate on the Globalstar Network requires activation in accordance with activation procedures established by Globalstar. Note that the operation of the commercial IoT-based product is subject to national certification and licensing requirements.

This certificate is intended only as formal notification to the manufacturer that Globalstar has determined, on the basis of test results completed by Globalstar, that commercial IoT-based products of the product code identified herein meet the standards for use with the Globalstar Network. This certificate is not a warranty and Globalstar hereby expressly disclaims any and all liability arising out of or in connection with the issuance, use, or misuse of this certificate.
